

Training efforts in the Netherlands: combining forces to provide data – related training for the life science research community

Celia van Gelder^{1,9}, Sanne Abeln², Rita Azevedo³, Luiz Olavo Bonino da Silva Santos^{1,2}, Jeroen Engelberts⁴, Rob Hooft¹, Mateusz Kuzak⁵, Leon Mei⁶, Marco Roos⁶, Merlijn van Rijswijk^{1,7}, Andrew Stubbs⁸, and Jaap Heringa^{2,9}

¹Dutch Techcentre for Life Sciences; ²VU University Amsterdam; ³Lygature; ⁴SURFsara; ⁵Netherlands eScience Center, Amsterdam; ⁶Leiden University Medical Centre; ⁷Netherlands Metabolomics Centre; ⁸Erasmus University Medical Center; ⁹BioSB Research School; All authors are member of the DTL/ELIXIR-Netherlands community

Our challenge: Many life scientists, technologists and data experts have to be trained in new skills and competences
Our focus: New technologies, data stewardship and data interoperability
Our approach:

- Connecting and building on the training expertise of the Dutch life science research community
- Building bridges between disciplines and application domains
- Actively engaging with international organisations and projects and with European research infrastructures
